

Fully managed SaaS solution, providing PSPs with a simple way to meet their Confirmation of Payee obligations.

Confirmation of Payee (CoP) is an account name-checking service designed to help reduce misdirected payments and provide greater confidence that payments are being sent, and collected from, the intended account holder for UK domestic payments.

CoP allows an account name to be checked before a payment is initiated or collected. It's an API based peer-to-peer service, without the need for central infrastructure.

## How do I participate in CoP?

An organisation can join CoP either directly, a 'Direct PSP Participant', or via an Aggregator, an 'Indirect PSP Participant'.

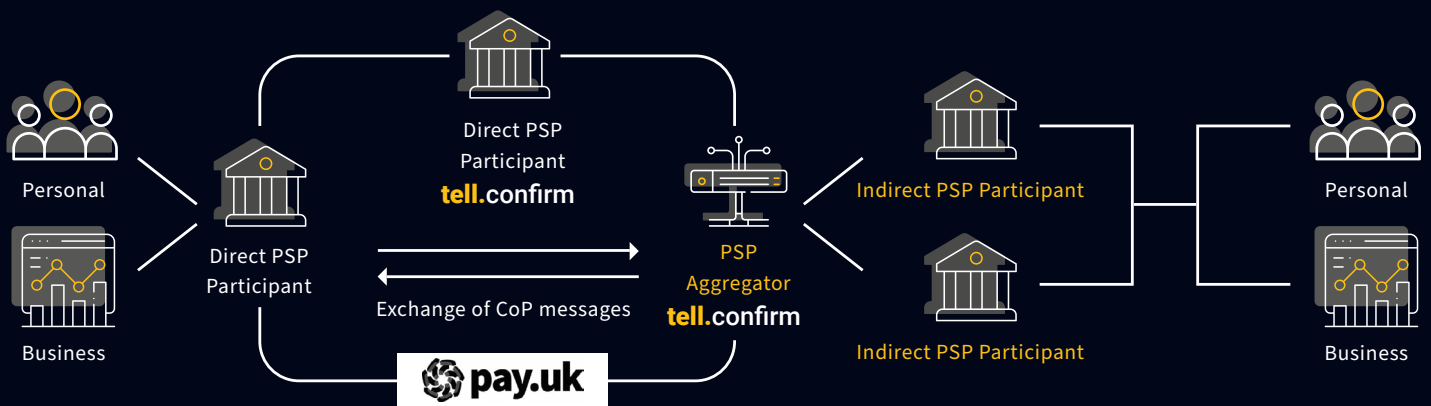

### Direct Model

As a regulated and approved Payments Service Provider (PSP), you can participate in CoP directly, by building in-house or by partnering with an approved CoP provider such as **tell.money**.

### Aggregator Model

The Aggregator model has been introduced by Pay.UK to allow more organisations to participate in CoP. Under this model, an Aggregator like **tell.money**, provide CoP services to PSPs and to corporate organisations.

## Participation models

If you need help to decide on the best way of participating, talk to **tell.money** – the time to act is now!

## Get in touch, and we'll be able to:

- ✓ Help you determine your CoP needs and the best way of participating
- ✓ Provide you with a tell.confirm demo, we'll show you how quick it is to get set up
- ✓ Talk you through our implementation processes and the simplicity of integration with the **tell.confirm** service
- ✓ Introduce you to the project support team that's part of the tell.confirm service
- ✓ Understand testing and certification and how tell.confirm removes complexity
